FIDELITY INVESTMENTS
LEAP TECHNOLOGY PROGRAM PANEL DISCUSSION
Please join us for this networking opportunity to learn more about the Leap Technology Program as well as the Fidelity Technology Internship Program. This is a great way to learn why Fidelity is leading the industry in technology by meeting our current Leap Associates and Fidelity Technology Recruiters.

Thursday, October 3, 2013 from 12:00-2:00pm
100 Salem Street, Smithfield, RI (Bring a photo ID and resume)

Please RSVP to: college.relations@fmr.com

The program offers five functional paths to choose from: Software Development, Systems Analysis, Quality Assurance, Mainframe Development and Technology Infrastructure and Engineering (TIE). Upon completion of the program, you will be placed in a dynamic role within Fidelity’s diverse technology organization.

<tr>
<td>Software engineers within Fidelity develop critical applications used by our internal and external customers for trading, benefits management, and core application needs.</td>
<td>Systems analysts at Fidelity provide essential requirements gathering and software design expertise to software development teams whenever a new application is developed, or a current application is enhanced or modified.</td>
<td>Associates within the Quality Assurance track develop key skills such as test planning, test case preparation, test automation, defect troubleshooting, systems-integration testing and project management.</td>
<td>Mainframe developers design and develop innovative solutions, enabling Fidelity to provide the best products and services to its customers.</td>
<td>TIE participants gain exposure to a broad spectrum of infrastructure and engineering topics including systems architectures and administration, network protocols and design, and database technologies.</td>
