Find job postings you’d like to try for:

1. go to Raytheon.com and select the Careers link (upper right on the page)
2. enter United States for a Location and Portsmouth for the Keyword; click Search Jobs
   [you can modify your entries for other searches, but start with this]
3. scroll down and look through the job titles and select one to go to a details page
4. expand the Responsibilities section and read
   - if it looks like it might be of interest, click Apply to go to another details page where there may be additional info.
5. if the listing looks like you’d like to go for it,
   DO NOT click Submit to Jobs (link at page bottom)
   DO copy the text at the top left of the page and send it to me, for example:
   
   120815BR
   **New Grad Software Engineer! Portsmouth, RI**
   RI - Portsmouth
   120815BR

6. go back to the list of job titles and repeat steps 3-5.

7. Go back to step 2 and use different search criteria as you desire. There are openings in Massachusetts (Tewksbury, Andover, Marlboro for the Keyword) and elsewhere, and you can enter specific areas of expertise. Repeat steps 3-5.

Send me as many entries as you’d like that interest you – this will allow me to enter your name and resume for each job posting (that’s the referral part).
